

# WHAT WE CHECK

## Vehicle Inspection, Verification & Transaction Checklist

A practical guide for buyers, sellers and vehicle owners

Our objective is simple: give customers clearer information about a vehicle before they make a decision. We check the car, review available documentation and highlight important findings - including imperfections.

**Inspect. Verify. Decide with Confidence.**

# 1. Used Car Inspection

A structured visual and functional review of the vehicle's major systems and condition.

|                                                                                                                              |                                                                                                                              |
|------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------|
| <b>✓ Chassis &amp; Frame</b><br>Visible signs of accident repair, welding, bends, corrosion or structural work.              | <b>✓ Engine Health</b><br>General running condition, unusual noise, visible leakage and obvious performance concerns.        |
| <b>✓ Transmission &amp; Drive</b><br>Gear engagement, shift behaviour and noticeable drivability issues.                     | <b>✓ Body &amp; Paint</b><br>Original paint, touch-ups, repainted panels, dents, scratches, rust and visible repair quality. |
| <b>✓ Suspension &amp; Steering</b><br>Noticeable noise, excessive play, steering behaviour and general suspension condition. | <b>✓ Tyres &amp; Wheels</b><br>Tyre condition, approximate tread, wheel/alloy condition and visible damage.                  |
| <b>✓ Interior Condition</b><br>Seats, dashboard, roof lining, door panels, trims and visible wear.                           | <b>✓ Air Conditioning</b><br>Cooling performance and basic operation of the AC system.                                       |
| <b>✓ Electrical Functions</b><br>Windows, locks, lights, multimedia, cameras and other fitted electronics.                   | <b>✓ Mileage / Odometer</b><br>Displayed odometer reading recorded at the time of inspection.                                |
| <b>✓ Road Test</b><br>Engine response, braking, steering, suspension, transmission and unusual sounds where appropriate.     | <b>✓ Visible Safety Equipment</b><br>Seatbelts, warning lamps and visible safety-related components where accessible.        |

**Important:** An inspection is a condition assessment at a point in time. It does not guarantee future mechanical reliability or replace manufacturer diagnostics.

# 2. Body & Paint Disclosure

|                                                                                                                                    |                                                                                                                 |
|------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------|
| <b>✓ Panel-by-Panel Paint Review</b><br>Record whether visible panels appear original, touched-up or repainted where identifiable. | <b>✓ Dents &amp; Scratches</b><br>Note visible dents, scratches, scuffs and cosmetic marks.                     |
| <b>✓ Rust / Corrosion</b><br>Identify visible corrosion or rust in accessible areas.                                               | <b>✓ Structural Repair Indicators</b><br>Highlight visible signs of welding, chassis work or major body repair. |
| <b>✓ Bumper Condition</b><br>Record paintwork, cracks, repair marks and fitment issues.                                            | <b>✓ Glass &amp; Lamps</b><br>Note visible chips, cracks or damage to glass and exterior lamps.                 |

### 3. Document & Ownership Verification

Vehicle condition matters. Ownership and documentation matter just as much.

|                                                                                                                       |                                                                                                                       |
|-----------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------|
| <b>✓ Registration Documents</b><br>Available registration details should correspond with the vehicle being offered.   | <b>✓ Registered Owner</b><br>Review available ownership information and confirm who is legally recorded as owner.     |
| <b>✓ Seller Identification</b><br>Seller CNIC / identification should correspond with the transaction requirements.   | <b>✓ Biometric Availability</b><br>Confirm biometric availability where required for ownership transfer.              |
| <b>✓ CPLC / Relevant Verification</b><br>Relevant verification should be obtained where applicable before completion. | <b>✓ Token Tax / Government Dues</b><br>Review available tax status and outstanding government dues where applicable. |
| <b>✓ Traffic Fines / Challans</b><br>Check outstanding fines where an official verification facility is available.    | <b>✓ Engine &amp; Chassis Numbers</b><br>Compare available records with visible vehicle identifiers where accessible. |
| <b>✓ Number Plate Status</b><br>Review registration number and available number-plate status.                         | <b>✓ Transfer Requirements</b><br>Confirm documents and steps required to complete ownership transfer.                |

### 4. Japanese Import Verification

|                                                                                                       |                                                                                                                               |
|-------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------|
| <b>✓ Auction Sheet</b><br>Review the available Japanese auction sheet and vehicle grade.              | <b>✓ Auction Grade</b><br>Record the grade and understand that grade alone does not replace inspection.                       |
| <b>✓ Chassis Number</b><br>Cross-check chassis information across available import documents.         | <b>✓ Export Certificate</b><br>Review the available Japanese export certificate where provided.                               |
| <b>✓ Auction Photographs</b><br>Compare available auction images with the current vehicle.            | <b>✓ Mileage Record</b><br>Compare available auction/export mileage information with the current odometer where available.    |
| <b>✓ Import / Clearance Documents</b><br>Review available import and customs clearance documentation. | <b>✓ Import &amp; Registration Year</b><br>Clearly distinguish model year, import/clearance year and local registration year. |
| <b>✓ Repair History Markings</b>                                                                      | <b>✓ Landed Cost Information</b>                                                                                              |

Review auction diagram markings and comments for repair or replacement indications.

Where applicable, provide a clear breakdown of major known import-related costs.

## 5. Sell My Car / Consignment Checks

### ✓ Vehicle Identity

Make, model, variant, model year, registration and chassis details.

### ✓ Mileage

Current displayed odometer reading.

### ✓ Condition Disclosure

Seller-provided and inspection-observed body, paint and mechanical condition.

### ✓ Ownership & Documents

Available ownership and registration documents reviewed before listing.

### ✓ Seller Contact & Identification

Confirm seller contact information and required identification.

### ✓ Asking Price

Agree an initial asking price / price range based on seller instructions and market context.

### ✓ Photography & Listing Details

Prepare accurate vehicle photographs and a factual listing description.

### ✓ Known Issues

Disclose known material imperfections rather than presenting the car as perfect.

## 6. Exchange / Trade-In Evaluation

### ✓ Current Vehicle Inspection

Assess the vehicle being offered in exchange.

### ✓ Documentation

Review available ownership and registration documents.

### ✓ Market Position

Consider condition, mileage, model, demand and comparable market context.

### ✓ Outstanding Dues

Review available tax / fine information where applicable.

### ✓ Exchange Difference

Clearly communicate the agreed value difference between vehicles.

### ✓ Transfer Readiness

Confirm biometric and documentation readiness for both sides of the transaction.

## 7. Islamic Auto Financing Assistance - What We Confirm

### ✓ Customer Requirement

Vehicle, approximate budget, down payment preference and financing requirement.

### ✓ Provider Eligibility

Basic eligibility requirements communicated by the relevant financial institution.

### ✓ Required Documents

### ✓ Vehicle Eligibility

Guide the customer on documents requested by the chosen provider.

Confirm whether the selected vehicle appears to fall within the provider's stated financing criteria.

#### ✓ Indicative Process

Explain the application path without representing approval as guaranteed.

#### ✓ Provider Terms

Rates, tenure, approvals and contractual terms remain the responsibility of the financing institution.

## 8. Motor Takaful Assistance - What We Confirm

#### ✓ Vehicle Details

Make, model, year, value and registration details required for quotation.

#### ✓ Provider Requirements

Information and documents required by the selected Takaful provider.

#### ✓ Coverage Options

Available coverage categories as communicated by the provider.

#### ✓ Contribution / Premium

Indicative contribution amount from the provider, subject to final underwriting.

#### ✓ Exclusions & Conditions

Encourage customers to review exclusions, deductibles and policy conditions.

#### ✓ Claims Responsibility

Claims decisions and settlement remain subject to the Takaful provider.

## 9. Buyer Checklist Before You Commit

#### ✓ Inspect the vehicle

Review the physical and mechanical condition before payment.

#### ✓ Read the inspection findings

Pay attention to disclosed touch-ups, repairs and known issues.

#### ✓ Verify ownership

Confirm who owns the vehicle and who is authorized to sell it.

#### ✓ Check documents

Review registration, identification and transfer requirements.

#### ✓ Confirm biometric readiness

Make sure required biometric verification can be completed.

#### ✓ Check applicable dues

Review available token tax, government dues and fines.

#### ✓ Understand the total cost

Agree vehicle price plus any documented fees or charges.

#### ✓ Complete transfer properly

Do not leave ownership transfer indefinitely pending.

## 10. Important Notes & Limitations

- Inspection findings reflect visible and testable condition at the time of inspection.
- Some defects may be hidden, intermittent or inaccessible without dismantling or specialist diagnostics.
- Document checks depend on the records and official verification facilities available for the vehicle and transaction.
- Financing and Takaful approvals, pricing and contractual terms are determined by the respective provider.
- Customers should review the final vehicle, documents, costs and transaction terms before committing.

### TRANSPARENCY MEANS SHOWING THE IMPERFECTIONS TOO.

A used vehicle may have paintwork, scratches, repaired panels or normal wear. Amanah Motors aims to give buyers clearer information so they can make a more informed decision.

**Amanah Motors - Har Gari Ek Amanah.**

Disclaimer: This guide describes Amanah Motors' intended inspection and verification workflow. Individual checks depend on vehicle type, accessibility, available records and the specific service requested. It is not a warranty, guarantee of future condition, legal opinion, finance approval or insurance/takaful policy.
